- **Testing**
 - **Unit tests (Cypress)**
 - **Functional tests**
- **DevOps & Monitoring**
 - **CI/CD pipelines**
 - **Grafana**
 - **Sentry**
- **Project management**
 - **Jira & Confluence**
 - **Scrum**
 - **GA4 & A/B Testing**

Languages

- **Spanish** Native level
- **English** C1 level
- **French** B1 level

Ignacio Jimenez

Software Engineer

Frontend Software Engineer with experience building high-traffic e-commerce applications and scalable user interfaces. Currently working at Inditex, delivering features, redesigns, and performance improvements for the global Zara's product catalog.

Previously contributed to complex cart and checkout flows in a large B2B marketplace and led a SaaS product in the travel-tech industry, bringing a strong product mindset and customer-first thinking into engineering.

Pragmatic, impact-driven, and comfortable operating in cross-functional environments.

Work Experience

- **ZARA** | Pier 01 Barcelona Tech City, Barcelona
Sep 2025 – Present

Frontend Engineer

Frontend Developer focused on the product catalog and grid architecture for the global fashion e-commerce platform ZARA. Deliver new features, contribute to major UI redesigns, and continuously improve performance and observability in high-traffic scenarios. Work cross-functionally to build scalable, reliable solutions that enhance the customer shopping experience.

- **METRO Markets** | Ria-Thiele-Straße 2a, Düsseldorf
Feb 2022 – Sep 2025

Frontend Engineer

Frontend Developer in the cart and checkout team of Metro's B2B online marketplace. Built and improved key functionalities including shipping logic, discounts, accessibility, and product recommendations. Contributed to the migration from Angular to Next.js, focusing on performance, maintainability, and clean UI/UX. Partnered with product and design teams while using tools such as Sentry, Grafana, and GA4 to monitor behavior and support data-driven improvements across multiple European markets.

- **Trivago N.V.** | Kesselstraße 5-7, 40221 Düsseldorf
Aug 2018 – Jul 2020

Team Lead – Hotel SaaS App (Acomate)

Led a cross-functional team in the development of Acomate, a SaaS platform helping independent hotels manage marketing, distribution, and direct bookings via trivago. Worked cross-functionally to translate customer needs into product features, define UX flows, and support hotel partners in optimizing performance. Although the project ended during COVID-19, it played a key role in shaping trivago's offering for small hotel partners.

- **Malmaison** | Oxford | 3 New Rd, Oxford, UK
Sep 2016 – Jul 2018

Reception & Hotel Operations

- Managed day-to-day front-desk operations and reservations.
- Developed a strong foundation in hospitality, communication, and team coordination.
